

MISSOURI COMMUNITY ASSESSMENT AND PLANNING PROCESS (MOCAPP)
ASSET MAPPING – FORM H1-H37

For each of the subcategories, the coordinator is responsible for leading an asset mapping session with their group. The session is best achieved by using a flip chart and markers and assembling all of the members of the subcommittee in a room together. The Asset Mapping is the second step in the assessment process and complements Form G completed in the previous step. This step is designed to put the members of the group in a positive frame of mind, which will allow them to focus on what the community has to offer now, which will then lead them into thinking of ways to improve the community in the future (goal setting - next step). Pose the following question to your group while filling in the appropriate blank with your subcategory title. Ask everyone in the room to complete the sentence. Make sure the manner in which they respond creates a complete, grammatically correct sentence. These are “assets.”

(Do not be concerned that some items may be duplicated from the Resource Form G.) Continue to list responses until the group has exhausted all possibilities. As long as the response is related to the subcategory, it is fair to include. Make sure everyone participates. Stay focused on the relevant assets of the category and repeat the question as often as it takes. Copy the items found on the flip chart paper to the space provided on this form.

ASSET MAPPING QUESTION

The citizens of our community enjoy opportunities to experience, make use of, and benefit from
_____ *(enter subcategory title) specifically because we have*
_____ *(complete the sentence).*
